Assessing EV Charging Station Needs

PROVIDE AN EMPLOYEE & VISITOR BENEFIT • SHOWCASE SUSTAINABILITY LEADERSHIP

An employee survey is a good place to start when assessing current and future demand for EV charging stations for your doctors, nurses and administrative staff. It is also important to assess the needs of visitors by inquiring with parking attendants and valet services on the number and frequency of electric vehicles at your facility.

Example Survey Questions

- Do you or anyone in your household own a plug-in hybrid electric vehicle (PHEV) or battery electric vehicle (BEV)?
 - If yes, where do you charge your vehicle most often?
- Are you considering leasing or purchasing an EV in the next year?
- Is having access to EV charging at work a deciding factor in your lease or purchase an EV?
- If EV charging is available at your workplace, how likely are you to charge there?
- Do you feel your organization should do more to support green energy within the community?
- Do you feel offering EV charging stations is an important employee and visitor benefit?

PLAN FOR FUTURE DEMAND

The Edison Foundation estimates that by 2030 there will be over 18.7 million electric vehicles on the roadways requiring additional EV charging infrastructure.

Be prepared for the future by installing Blink IQ 200 charging stations today and differentiate yourself from other healthcare facilities.

When you are ready, an EVI representative can help you accurately assess the need for your community.
